

## Product Change Notification

**Publish Date:** 10/4/19

**Effective Date:** 11/1/19

**Change Type:** Product function

### Products Affected

Model: Mission VM-PRO

SKU: VM-PRO-PZ-CN, VM-PRO-CN, VM-PRO-PZ-RD, VM-PRO-RD, VM-PRO-PZ-BK, VM-PRO-BK, VM-PRO-PZ-OW, VM-PRO-OW

**Description of change:** Beginning 11/1/19, all VM-PRO volume pedals will be supplied with Mission Ultrasweep™

**Details of change:** Ultrasweep is a new mission potentiometer and circuit design that provides ideal logarithmic tapers for an active volume pedal. Working in conjunction with the VM-PRO's internal amplifiers, Ultrasweep provides an improved volume change sensitivity making the VM-PRO more suitable for solo volume swells and similar effects than the previous version. Beginning the effective date, all VM-PRO models will be fitted with Ultrasweep. There is no part # change. Older versions without Ultrasweep will no longer be available. Presence of Ultrasweep will be indicated by the VM-PRO Ultrasweep logo on the front of the unit.
